# **Standalone Digital Video Recorder**

Premium DVR 4, 8, 16 Channel Models

# **User`s Manual**

## MADE IN KOREA

#### **FCC Compliance Statement**

Notice to Users: This equipment has been tested and found to comply with the limits for a Class A digital device. Pursuant to Part 15 of the FCC Rules, these limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

#### CAUTION

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The equipment complies with the requirement of FCC CFR 47 PART 15 SUBPART B, Class A.

#### **Explanation of Graphical Symbols**

This symbol indicates the presence of important operating and maintenance (servicing) instruction in the literature accompanying the product.

This symbol indicates the presence of non-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

#### Warnings

- Installation and servicing should be performed only by qualified and experienced personnel.
- Power off the DVR when connecting cameras, audio, or sensor cables.
- The manufacturer is not responsible for any damage caused by improper use of the product or failure to follow instructions for the product.
- The manufacturer is not responsible for any problems caused by or resulting from the user physically opening the DVR for examination or attempting to fix the unit.
- The manufacturer may not be held liable for any issues with the unit if any labels are removed in the product.

## Cautions

- This product has multiple-rated voltages (110V and 220V). See installation instructions before connecting to the power supply.
- This product uses a Lithium battery.
- To avoid any risk of explosion, do not replace the battery on the main board by anything other than a Lithium battery.
- Dispose of used batteries according to the manufacturer's instructions.
- This equipment and all communication wirings are intended for indoor use only.
- To reduce the risk of fire or electric shock, do not expose the unit to rain or moisture.

## WEEE(Waste Electrical and Electronic Equipment)

Customers in European Union countries are advised to dispose this product, at the end of its useful life, as per applicable local laws, regulations and procedures.

## **Important Safeguards**

### 1. Read Instructions

• To reduce the risk of fire or electric shock, do not expose the unit to rain or moisture.

## 2. Retain Instructions

• The safety and operating instructions should be retained for future reference.

### 3. Cleaning

• Unplug this equipment from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.

## 4. Attachments

• Never add any attachments and/or equipment without manufacturer approval as such additions may result in the risk of fire, electric shock, or other personal injury.

## 5. Water and/or Moisture

• Do not use this equipment near water or in contact with water.

### 6. Accessories

- Do not place this equipment on an unstable cart, stand or table. The equipment may fall, causing serious injury to a child or adult and serious damage to the equipment.
- Wall or shelf mounting should follow the manufacturer's instructions and should use a mounting kit approved by the manufacturer.

• Move this equipment and cart combination with care. Quick stops, excessive force and uneven surfaces may cause the equipment and cart combination to overturn.

### 7. Power Sources

• This equipment should be operated only from the type of power source indicated on the marking label. If not sure the type of power, please consult to distributor or local power company.

### 8. Power Cords

• Operator or installer must remove power, BNC, alarm and other connections before moving the equipment.

## 9. Lightning

• For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the equipment due to lightning and power-line surges.

## 10. Overloading

• Do not overload wall outlets and extension cords to avoid the risk of fire or electric shock.

## 11. Objects and Liquids

- Never push objects of any kind through openings of this equipment as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock.
- Never spill liquid of any kind on the equipment.

## 12. Servicing

• Do not attempt to service this equipment yourself. Refer all servicing to qualified service personnel.

## 13. Damage Requiring Service

- Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:
- 1 When the power-supply cord or the plug has been damaged.
- ② If liquid is spilled or objects have fallen into the equipment.
- ③ If the equipment has been exposed to rain or water.
- ④ If the equipment does not operate normally by following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation.
- ⑤ If the equipment has been dropped or damaged the cabinet.
- 6 When the equipment exhibits a distinct change in performance-this indicates a need for service.

## 14. Replacement Parts

• When replacement parts are required, ensure the service technician uses replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

### 15. Safety Check

• Upon completion of any service or repairs to this equipment, ask the service technician to perform safety checks to determine that the equipment is in proper operating condition.

### 16. Field Installation

• This installation should be made by a qualified service person and should conform to all local codes.

### 17. Correct Batteries

## CAUTION

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### 18. Operating Temperature

• An operating temperature range is specified so that the customer and installer may determine a suitable operating environment for the equipment.

### 19. Elevated Operating Ambient Temperature

• If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the specified operating temperature range.

### 20. Reduced Air Flow

• Installation of the equipment in the rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.

## 21. Mechanical Loading

• Mounting of the equipment in the rack should be such that a hazardous condition is not caused by uneven mechanical loading.

## 22. Circuit Overloading

• Consideration should be given to connection of the equipment to supply circuit and the effect that overloading of circuits might have on over-current protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.

### 23. Reliable (Grounding)

• Reliable grounding of rack mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (for example, use of power strips).

## Warning

Warranty is void if seal or label is removed or damaged.

# **Operation Precautions**

## O Power Off

- Do not turn DVR off, or plug off the power adapter while <u>DVR is in operation (record/playback)</u>. Otherwise, it may cause permanent damage to the equipment. Please click (+) SETUP>SYSTEM>Shutdown sequentially and then remove the power after DVR is shutdown completely. It is safe to wait for 5 seconds before turning the power on again.
- Do not turn DVR off, or plug off the power adapter while <u>External storage device (e.g., USB memory stick, removable</u> <u>external hard disk and the like)</u> in use. Otherwise, it may cause permanent damage to the equipment. Make sure that the power switch is in the "ON" position until data storage is completed. Please be aware that removing the storage device cause the same damage to the equipment.
- Do not turn DVR off, or plug off the power adapter <u>during the format of the hard disk</u>. Otherwise, it may cause permanent damage to the equipment. Make sure that the power switch is in the "ON" position until the formatting of the disk is completed.

## O HDD Installation / Addition / Moving / Replacement / Removal

- For installation/addition/replacement/Removal of HDD (DVD-RW), make sure that DVR is turned off. Otherwise, it may cause permanent damage to the HDD (DVD-RW).
- When wish to power DVR off, please click (↔) SETUP>SYSTEM>Shutdown sequentially and then remove the power after DVR is shut down completely.
- Installation/Addition/Moving/Replacement: Start 'HDD initialization' including formatting. Otherwise, DVR would not recognize the hard disk and may begin to function abnormally. Please follow the below procedure for 'HDD initialization'.
- 1 (Date/Time setup) Set up the current date and time (SETUP>SYSTEM>Admin>Date/Time).
- (Initialization of system setup) All setup values are restored to original factory default settings. (SETUP>SYSTEM>Information>Status>Setup>Default).
- ③ (HDD format) HDD format is done by SETUP>SYSTEM>Admin>Storage>Format. If there are more than two HDDs, each must be formatted, separately. When the format is completed, DVR will auto-reboot.
- **Removal:** Follow the Remove procedure even when a pre-installed hard disk has been removed.
- SETUP>SYSTEM>Admin>Storage>Format, click (↔) 'Removed' item under the discrete Format headings of a corresponding HDD to discard 'HDD' item. When the Remove procedure is completed, DVR will auto-reboot.

## O Date / Time Change

- Any change in Date/Time is immediately applied onto live video (LIVE), but the date/time when the recording was done are not changed.
- Make sure to reboot DVR after adjusting the Date/Time.
- Also, do not forget to execute SETUP>SYSTEM>Shutdown in sequence before reboot.

## O Upgrade

• Do not upgrade until install a hard disk drive. Make sure that upgrade when the hard disk drive is in proper operation.

## O Using a Mouse

- Left mouse button: have the same function as Enter (+) on the Front panel of DVR.
- Central button (wheel): have the same function as Search key on the Front panel of DVR(display search menu).
- **Right mouse button:** display a number of 'Function keys' (please see 'Input Device and Screen Icons>Using a mouse' in this manual).

## O PLAY / PAUSE Key

- Press the **PLAY/PAUSE** key to one-touch playback on the viewing screen (playback the recorded video from the last one minute).
- Every time pressing the **PLAY/PAUSE** key during playback mode, it is changed to '1X PLAY' and 'PAUSE'. The displayed sign on the screen also changes from ▶ to **II**.
- If wish to change mode (1X PLAY, REW, FF, BACKWARD, FORWARD) during playback, always press the **PLAY/PAUSE** key first (please see if the sign **II** is shown on the screen).
- Press the PLAY/PAUSE key to back up. Make sure that the backup is done in 'PAUSE' mode.

## O Camera Title

• Camera Title displayed in Record and Playback modes of DVR is set to CAM1 ~CAM16. Registering camera title in setup menu (DEVICES>Camera/PTZ>Title) is to make every setup process easier.

# 1. Product Features

# 1.1 Unpacking

- This equipment is an electronic appliance, so it should be handled with special care.
- After unpacking, please check if all the following items are included.
- DVR Main body
- A Type : Power Supply Adapter (DC 12V, 3.33A) and Power Supply Cable
- B, C and D Type : Power Supply Adapter (DC 12V, 5A) and Power Supply Cable
- EType : Power Supply Adapter (DC 12V, 6.67A) and Power Supply Cable
- F and G Type : Power Supply Cable
- Remote Control With 2 AAA batteries
- Installation CD (CMS Software & User's Manual)

## 1.2 Service

• If there is any problem in the product, please refer servicing to a supplier or a distributor with qualified service personnel.

# 1.3 System Connection Diagram

# 2. Installation

## 2.1 Hard disk and DVD-RW Installation

## 2.1.1 SATA Port

## •A Type

- Main substrate of this DVR has one SATA port: it is indicated as SATA 1.
- Only one SATA device (hard disk) is possible to connect in Serial to the SATA port.

## B and D Type

- Main substrate of this DVR has three SATA ports: they are indicated as SATA 1, 2 and SATA 3.
- Please mount DVD-RW at the SATA 3 port.

## C Type

- Main substrate of this DVR has four SATA ports: they are indicated as SATA 1, 2, 3 and SATA 4.
- Please mount DVD-RW at the **SATA 4 port**.

## E, F and G Type

- Main substrate of this DVR has five SATA ports: they are indicated as SATA 1, 2, 3, 4 and SATA 5.
- Please mount DVD-RW at the SATA 4 port.
- Up to five SATA devices (hard disk and DVD-RW) are able to be connected to the SATA ports in serial, however the devices must be connected onto correct SATA port.
- Refer to below table to mount a hard disk and DVD-RW.

## 2.1.2 Internal SATA Storage (E, F and G Type)

- These series DVRs have 5 Internal SATA Ports: The picture below shows internal ports 1-4 SATA Port and 5 SATA Port.
- 1-3 SATA Port: It is designed to mount HDD.
- 4 SATA Port: Please mount DVD-RW.
- 5 SATA Port: It is specifically designed to mount HDD ONLY.
- Only one DVD-RW can be installed among the SATA Ports.

## CAUTION

Do not mount DVD-RW at SATA 5 Port.

## 2.1.3 e-SATA External Storage (E, F and G Type)

- This series DVR has 2 external SATA Ports; the picture above shows external SATA 6-7 Port.
- 6-7 SATA Port: It is designed to mount 4HDDs per each external SATA Ports.

## 2.1.4 HDD Installation

- Securely fix a hard disk by using bracket and screws provided herewith.
- Please do not use any different hard disk cables (data cable and power supply cable) other than ones we provide.
- Otherwise, it may cause damage to the hard disk.

### CAUTION

Install hard disk after DVR power is off. Otherwise, it may cause permanent damage to the hard disk. To turn off DVR, please click (+) SETUP>SYSTEM>Shutdown. Also, wait for 5 seconds before plugging in power supply again.

## CAUTION

- For installation/addition/replacement/Removal of HDD (DVD-RW), make sure that DVR is turned off. Otherwise, it may cause permanent damage to the HDD (DVD-RW).
- Installation/Addition/Moving/Replacement: User should start 'HDD initialization' including formatting. Otherwise, DVR won't recognize the hard disk and may begin to function abnormally. Please follow the below procedure for 'HDD initialization'.
- ① (Date/Time setup) Set up the current date and time (SETUP>SYSTEM>Admin>Date/Time)
- 2 (Initialization of system setup) All values in setup are restored to factory default settings
- (SETUP>SYSTEM>Information>Status>Setup>Default)
- ③ (HDD format) HDD format is done by SETUP>SYSTEM>Admin>Storage>Format. If there are more than two HDDs, each must be formatted, separately. When the format is completed, DVR will auto-reboot.
- Removal: Follow the Remove procedure even when a pre-installed hard disk has been removed. In
  - SETUP>SYSTEM>Admin>Storage>Format, click (↔) 'Removed' item under the discrete Format headings of a corresponding HDD to discard 'HDD' item. When the Remove procedure is completed, DVR will auto-reboot.

## 2.1.5 Maximum HDD Capacity

- · Each model has a different HDD capacity recognition.
- Below table shows the recommended maximum HDD capacity for each model.

Model	A type	B type	C type	D type	E type	F type	G type
Capacity	2TB	4TB	6TB	4TB	16TB	16TB	16TB

## 2.1.6 DVD-RW installation

- Securely fix DVD-RW by using bracket and screws provided herewith.
- Please do not use any different DVD-RW cables (data cable and power supply cable) other than the ones we provide.
- Otherwise, it may cause damage to the DVD-RW.
- Only one DVD-RW can be used. Mount it at the SATA 3 port. (B and D Type) or SATA 4 port (C, E, F and G Type).

## CAUTION

Install DVD-RW hard disk after DVR power off. Otherwise, it may cause permanent damage to the hard disk. To turn off DVR, please click (+) SETUP>SYSTEM>Shutdown. Also, wait for 5 seconds before plugging in power supply again.

## 2.2 Connector Wiring

## 2.2.1 Video-In/Out Connections

- Connect a camera to 'VIDEO IN'.
- If user wishes to link camera input to another device, please connect the camera to 'LOOP OUT'.
- Assure the 'VIDEO IN' and 'LOOP OUT' connections are connected properly, not oppositely.

## (NOTE)

Only C, E and F Type model supports LOOP OUT connection and G Type supports HD-SDI LOOP OUT connection.

## 2.2.2 Monitor Connections (Video Out, VGA and Spot)

- Use with CCTV monitor and computer monitor. Please connect the CCTV monitor to 'VIDEO OUT', the computer monitor to 'VGA', respectively. If necessary, connect another CCTV monitor to 'SPOT', 'MULTI SPOT'
- Multi Spot (D and E Type)
- This function supports Multi Channel Display on Spot Monitor
- Connect BNC cable between spot monitor and multi spot port of rear panel.

## 2.2.3 HDMI connections (D, E, F and G Type)

- Connect HDMI cable to HD out port of rear panel and HDMI port of HD output device.
- Please click (↔) SETUP> DISPLAY> VGA and the following screen will appear.

	VGA DISPLAY
DISPLAY OSD Main Monitor Spot Monitor VGA	HD Audio output Resolution 1920 x 1080
27	OK Cancel

- If user wishes to hear audio via HDMI cable, check the box HD Audio Output
- Click the box below to select resolution.
- User can select the resolution among '1920x1080 RB', '1920x1080', '1680x1050 RB', '1680x1050', '1280x1024', and '1024x768'
- The default setting of DVR is '1280 x 1024'.

## (NOTE)

- Only D, E and F Types support HDMI connection.
  - Only D and E Type supports HDMI connection and Multi Spot.
- F and G Type do not have Multi Spot. But support HDMI.

## 2.2.4 Audio Connections

• Connect an audio device to 'AUDIO IN' and a speaker system to 'AUDIO OUT'. Please use a speaker system with volume adjustable.

## 2.2.5 TCP/IP(Ethernet) Connections

- Connect to 'ETHERNET' connector with the LAN cable.
- When connect to Internet, use an ordinary LAN cable (Non-cross cable). However, when connect directly to a PC, please use only 'Crossover cable'.

## 2.2.6 Alarm Connections

- Connect Alarm Input (Sensor) to 'AI 1~AI 4 (AI 16)' connectors and connect Sensor Common to 'G' connector.
- Connect Alarm Output (buzzer, siren, etc.) to 'AO 1~AO 4 (AO 16)' connectors and connect Common to 'G' connector.
- Connect Pan/Tilt receiver (or Pan/Tilt camera) to 'RS-485/422' connector. Please observe proper (+) and (-) polarity.

## 2.2.7 RS-485/422 Connections

- PTZ Camera connector.
- Please use TX+, TX-, RX+ and RX- terminals.

## 2.2.8 USB Connections

• There are four identical USB ports in front and in rear. It is possible to connect a USB memory stick to archive data or a mouse to control the device.

## 2.2.9 RS-232 Connections

• This port is not in use for users. Do not connect any devices through this port.

## 2.2.10 Factory Reset Switch

- Reset the switch to restore all setup values of menus to factory default settings. It is also possible to use to initialize System Log file.
- The switch is located in a pin hole of the back panel.
- Put the clip pin into the switch hole on the monitor (Live) screen and keep pressing until the switch has clicked.

## CAUTION

Press factory reset switch only in live mode. Never press in setup mode.

## 2.2.11 Power Supply connections

- A Type : Plug the power supply adapter (DC 12V, 3.33A) which include in this product to 'DC12V' connector and plug another side to power source. Adapter input voltage is a free volt (100 VAC ~ 240 VAC). Please do not use any different power supply adapter because it may cause the DVR to malfunction.
- **B, C and D Type** : Plug the power supply adapter (**DC 12V, 5A**) which include in this product to '**DC12V**' connector and plug another side to power source. Adapter input voltage is a free volt (100 VAC ~ 240 VAC). Please do not use any different power supply adapter because it may cause the DVR to malfunction.
- **E Type** : Plug the power supply adapter (**DC 12V, 6.67A**) which include in this product to '**DC12V**' connector and plug another side to power source. Adapter input voltage is a free volt (100 VAC ~ 240 VAC). Please do not use any different power supply adapter because it may cause the DVR to malfunction.
- F and G Type : <u>AC powered DVR:</u> Plug the power supply cable into the power supply (the wall socket). Input voltage is a free volt (100 VAC ~ 240 VAC).

## 2.2.12 Connections Guideline

- Video Out Connector: If only the monitor is connected to VIDEO OUT connector, please set the impedance switch on the rear side of the monitor to 75 ohms to prevent abnormally bright or collapsed images. If wish to connect another device (e.g., a recorder) to the back of the monitor, please set the impedance switch on the rear side of the monitor to HIGH Z (High Impedance) and set the last device to 75 ohms.
- Alarm Input Connector: Do not input any type of voltage to the AI 1~AI 4 (AI 16) connectors.

# 3.3 Front Panel

# А Туре

## B and D Type

## C, E, F and G Type

## 3.4 Using a Remote Controller

- Usage of a remote controller is same as the front panel keys.
- Follow the procedure below when using the remote controller for multi DVRs.
- 1 Check System ID (e.g., between 1 and 255) of the DVR that wish to use.
- (SETUP>SYSTEM>Information>Status>System ID).
- ② Holding up the remote controller to face towards the DVR and press the System ID numbers one by one, while pressing ID button on the remote controller. Note that the System ID is a **3-digit number**. Button '**10**' functions the same as '0'.
  - (e.g.: If System ID is 3, press 10>10>3 buttons in sequence while pressing the ID button)

# 3.5 Using a Mouse

- Mouse provides an easier access to adjustment. Refer to below for proper use.
- Left mouse button functions the same as **Enter** ( $\leftarrow$ ) key on the front panel of DVR.
- Right mouse button displays the following "Function keys" on screen.
- Click Search menu at "Function Keys" the same as **Search** key on the front panel of DVR. Press the button, then the Search menu will appear on screen.

# 4. Setup

## 4.1 Login / Logout

- At the default setting of DVR, user has to input the password to enter the set up menu.
- Please press SETUP key to enter the setup menu and the following screen will appear.

Login						
ID	admin 🕨					
Password						
ок	Cancel					

- In order to use all functions and privileges, log in as ID: admin.
- Default Password is "1111".
- At Setup>System>Account, Administrator should set a user rights depending on each user separately in "Login Settings".
- After login successfully, following screen will appear:

- Recording continues during setup.
- Main menu consists of 5 sub menus.
- (SYSTEM / DISPLAY / DEVICES / RECORD / LINK)
- There is no factory default in the case of passwords.=> Factory default function cannot be applied to passwords.
- To escape from the setup menu, please click (+) SYSTEM>Exit on the screen. Then, the following dialogue box will appear.

		SYSTEM Information
		nn orma uon
28	?	Are you sure to exit?
	_	Shutdown
Ŷ		27

- Please choose 'OK' to log out.
- User may select the Main menu with ◀, ► direction keys or mouse click. Please click (↔) the submenu to choose the one under the Main menu.

#### (NOTE)

Press AUDIO/ESC in the setup screen. It operates alike CANCEL (ESC). It will not operate live or playback mode but only in the setup menu.

## 4.2 SYSTEM

## 4.2.1 Information

• Please click (+) SYSTEM>Information and the following screen will appear.

## Status

#### Site Description

- Decide on a name of DVR.
- Please click (+) keyboard icon on Site Description frame and the following virtual keyboard will appear.

789	0@\$	
7 8 9		II II. II.
	୰⋓⋑	- = ← 켍
GHI	JKL	M ctrl
TUV	WXY	Z 1 shift
. 7 ?	1~	space
	T U V . / '	T U V W X Y

- Please click (+) desired letters (characters) on the virtual keyboard to input.
  - Use to erase one character every time.
- 2 Use to erase the whole sentence.
- Please choose 'OK' to confirm the input and choose 'Cancel' to cancel.

### System ID

(1)

- Control DVRs by one remote controller by setting DVR IDs.
- Please click (←) ▲, ▼ direction keys on the right-hand side of the System ID frame to set the ID of DVR. Take any whole number between 1 and 255.
- While pressing (+) or (-) button, the System ID value increases or decreases by 10 units.

## Language

• Please click (+) Language frame to choose desired language and press (+) key again.

#### Setup

• Default: Click (←) Default frame to restore all setup values of menus to factory default settings. Please note that System Log is not initialized.

### (NOTE)

This has a different function from Factory Reset Switch on the back panel of DVR in that System Log is not initialized.

- Import: Copy the Menu setup stored in USB memory stick into DVR. Please plug in the memory stick and then click (←) Import.
- Export: Store the Menu setup of DVR in USB memory stick. Please plug in the memory stick and then click (+) Export.
- When user is on Default, Import or Export process, a message box will ask the progress and click the confirmation icon, then a message box will show whether its success or failure.

## System Log

- Export: Store the System Log contents in USB memory stick. Please plug in the memory stick and then click (+) Export.
- When user is on Default, Import or Export process, a message box will ask the progress and click the confirmation icon, then a message box will show its success or failure.

### Version

• When user complete Status data input, please click (+) Version and the following screen will appear.

### Version Upgrade

- User may upgrade DVR software.
- Please follow the Upgrade procedure below.
- ① Plug USB memory stick having upgrade file into DVR.
- ② Click (↔) Load frame. Then, software version stored in the USB will appear on the left-hand side.
- ③ Click (←) Start frame to start the upgrade.
- ④ When the upgrade is completed, a dialogue box pops up. Please choose 'OK' and DVR will auto-reboot.

## CAUTION

DO NOT UPGRADE UNTIL INSTALL A HARD DISK DRIVE. MAKE SURE TO UPGRADE WHEN HDD IS IN PROPER OPERATION.

## CAUTION

PLUGGING OUT USB DEVICE OR FORCED POWER-OFF MAY CAUSE PERMANENT DAMAGE.

#### Record

• When user completes Version input, please click (+) Record. Then, the following screen will appear.

Information	SYSTEM
Status	Version Record
Start Date End Date	2010/11/17 14:33:00 2010/11/19 10:19:28
	Overwrite Setting Clear All Data
	OK Cancel

• The screen shows start time and end time of recorded data.

### **Overwrite Setting**

• Click (+) Overwrite Setting button and the following screen will appear.

Information	878	TEM
Overwrite	Setting Inform	mation
	Rec Days	Unlimited
	Disk Overwrite	
	Disk full notify	
	Used	90 %
	🗌 Alarm-Out	None
	🔲 Веер	
	🔲 Blink Message	
	0	DK 💼

- User shall designate the total recording days from 1 day to 30 days and unlimited.
- User may set for beeping or notifying messages that notify the used percentage of disk.
- Check Disk Overwrite and user may activate the overwrite function.
- This function makes restart the recording from the beginning when the HDD is full. The previous recorded data will be

erased from the first one. Following icon will display in bottom of live mode

- 1 Uncheck ( $\Box$ ) Disk Overwrite, recording will stop automatically when the HDD is full.
- 2 At no Overwrite mode, 12 icon will appear when HDD capacity is full that indicates the recording has stopped and,

icon will appear while the recording is going on.

- ③ If user changes this setting, the warning message will appear. Then click (↔) "confirmation" button and user may change the setting.
- If user checks (☑) Disk full notify item, the warning message will appear as the used amount of disk.
- 1 Used
- User may set the certain value of HDD usage for notification. It will notify at that point. The values are from 50 ~ 100%.
- 2 Alarm-Out
- The Alarm-out will happen at the used amount of HDD which is specified at Used.
- 3 Beep
- Check (I), the warning sound will happen at the used amount of HDD which is specified at Used.
- ④ Blink Message
- Check (☑), the warning message "Disk Used(xx%)!" will appear on the OSD.

### (NOTE)

Notify setting does not affect saving the recorded data. It only gives notification and keep recording until hard disk is full.

### (NOTE)

For more specific setting about Alarm-out, use Setup>DEVICES>Alarm Out.

### Clear All Data

- Use to delete or purge all normal recorded data from database. Please follow the procedure below.
- Click (←) Clear All Data frame.
- 2 When a dialogue box asking "Remove All Data?" shows, choose 'OK'.
- ③ Then, Progress window will appear and the process starts.
- ④ When all data are deleted, a dialogue box asking "Are you sure to remove log?" will pop up.
- (5) Choose 'OK' to delete all the recorded data as well as System Log.

## (NOTE)

This might take a while to completely delete all data. In case of 80GB HDD for example, it takes about 90 seconds.

• When user finished all the necessary inputs to SYSTEM menu, please click (↔) 'OK' on the bottom to go back to SETUP screen.

## 4.2.2 Admin

• Please click (+) SYSTEM>Admin and the following screen will appear.

Admin	SYSTEM		
	Date/Time NTP Storage		
	Date 2010 - 11 - 24 🗘 Time 11 : 21 : 44 🗘		
	Time Zone GMT-00:00 Greenwich Mean Time : Dublin		
	Use Daylight Saving Time Period		
	Date Format YYYY-MM-DD		
	Time Format 24 Hour		
	OK Cancel		

## Date / Time

#### Date

- This menu will allow user to adjust the settings.
- Please follow the procedure below for time adjustment.
- ① Click (+) items (Y, M, D) to change. A designated item will be highlighted in a box (Y: Year, M: Month and D: Date).
- ② Adjust the number by clicking (←)  $\blacktriangle$ ,  $\blacktriangledown$  buttons on the right-hand side.
- 3 Repeat the same procedure to change Y, M and D.

#### Time

• This menu will allow user to adjust the current time. The adjustment procedure is same as of Date.

#### CAUTION

IF ADJUSTED DATE/TIME IS PRIOR TO RECORDED DATA, DATA AFTER NEW DATE/TIME MAY BE ERASED.

### CAUTION

ANY CHANGE IN DATE/TIME IS IMMEDIATELY APPLIED ON VIEWING SCREEN (LIVE), BUT THE DATE/TIME WHEN THE RECORDING WAS DONE IS NOT CHANGED. MAKE SURE TO REBOOT DVR AFTER CHANGING THE DATE/TIME. DO NOT FORGET TO EXECUTE SHUTDOWN (SYSTEM>Shutdown) BEFORE REBOOT.

### Time Zone

- Please click (+) Time Zone frame to see the list of nations and choose one.
- Click (+) a check box next to Use Daylight Saving Time. When user dwells in a region of DST area, please check it (i.e. 🗹).
- If DST is observed, please click (+) Period and the following screen will appear.

Admin	SYSTEM			
	Date/Time NTP Storage			
	Date 2010 - 11 - 24 🗧			
	Daylight Saving Time			
	+:Dublin			
	Begin 3 🔯 2 nd 🔯 SUN 🔯 od			
	End 11 🖸 1 st 🖸 SUN 🖸			
	OK Cancel			
	OK Cancel			

- Adjust the dates of beginning (Begin) and end (End) of DST by 'Month/Week/Weekday'.
- Click (+) the numbers in 'Month/Week/Weekday' for adjustment.
- Choose 'OK' to confirm the setting.

## Date Format

• Set date indication format. Please click (+) Date Format frame to select a format from the list.

## Time Format

• Set time indication format. Please click (+) Time Format frame to select a format from the list.

## NTP

• When user complete Date/Time input, please click (+) NTP and the following screen will appear.

Date	/Time NTP Storage
📃 🛛 Run as Server	
Use NTP	
NTP Server	65.23.154.62
Interval	12 Hour
System Clock	2010/11/24 11:21:44 Sync
Server Clock	Not connected Connect

- This menu is for accurate setting of time of day clock in DVR.
- User may check ☑ only one of Run as Server and Use NTP.
- Run as Server: NTP cannot be used in a non-networked environment (Intranet environment). In this case, DVR with Run
  as Server functions as Time Server.
- Use NTP: Connect to Internet to synchronize DVR clock with Network Time Server's clock.

#### **NTP Server**

• Click (-) keyboard icon in NTP Server frame and the virtual keyboard will appear. Input IP address of NTP server.

#### (NOTE)

Currently used NTP is administered by pool.ntp.org and its IP address is 65.23.154.62. However, users are allowed to use IP address of any NTP site.

#### Interval

• Set clock-update-interval from NTP Server. Normally, user can adjust 1 hour up to 24 hours.

### System Clock

• Display DVR clock.

#### Server Clock

- Display NTP Server's clock if Internet is connected to Server Clock. If not displaying, please click (+) Connect button.
- When Server Clock is displayed, please click (↔) Sync button to synchronize NTP Server's clock with DVR clock.
- Choose 'OK' to confirm the clock synchronization.

#### Storage

- When user completes NTP input, please click (+) save and the following screen will appear.
- Set S.M.A.R.T. (Self-Monitoring Analysis and Reporting Technology) function for HDD format and auto-display of HDD information. DVD-RW is not shown here.

Admin	SYSTEM				
	Date/Time NTP Storage				
NO	HDD Info	Capacity	S.M.A.R.T	Format	
1	[P:M] ST32000542A	1953 GB	Good		
2					
3					
4					
S.M.A.R.T Setup					
OK Cancel					

• Clicking Up and Down button for checking up the status of HDD and DVD-RW devices.

- Using E-SATA port will allow users to connect up to maximum 12 HDD +1 DVD-RW.
- When user installs full storage device and DVD-RW including two e-SATA storage, then following procedures will be listed as below:
  - 1. Internal SATA 1~4 Ports
- 2. External SATA 1
- 3. External SATA 2
- 4. Internal SATA 5 Port
- 5. DVD-RW

#### (Note)

Only E, F and G Type support e-SATA storage.

### Format

- User must format when:
- install new HDD
- add another HDD
- replace HDD
- move HDD (change installation port)
- remove HDD
- Click (+) Add/Remove frame in Format column and choose 'OK' on the dialogue box to start formatting.
- Following format, DVR will auto-reboot. If there are more than 2 HDDs, please formats each of HDDs. DVR will auto-reboot when all the HDDs are formatted.
- If the frame changes to '---'after reboot, it means formatting has been properly done.

#### CAUTION

EXECUTE REMOVE PROCEDURE EVEN WHEN USER REMOVE PREVIOUSLY INSTALLED HDD. THE REMOVE PROCEDURE IS THE SAME AS THE FORMAT PROCEDURE DESCRIBED ABOVE.

## S.M.A.R.T

• Click the frame on S.M.A.R.T column and temperature and HDD damage will show.

### S.M.A.R.T Setup

• Please click (-) S.M.A.R.T Setup and the following screen will appear.

- Check the square box ☑ next to Use On. Through S.M.A.R.T function, make alarm message, indicating HDD damage, will show.
- Check ☑ Beep; it will give the alarm sound, indicating HDD damage, as the SMART setup.
- Check ☑ Blink Message, the alarm message will blink on the OSD, as the SMART setup.
- If "Use on" box is unchecked, Beep, Blink Message will be unchecked automatically. Only when "Use on" is checked⊠, user can set Beep, Blink Message function.
- Click (+) Inspection Time frame to set inspection time.
- Click Check by frame to select inspection interval.
- Last Check Time: show the time of the last inspection.
- Click (↔) ▲, ▼ direction buttons on the right-hand side of Temperature frame to adjust to maximum temperature for the HDD used in DVR. In general, it is **55**°C.

- Click (↔) ▲, ▼ direction buttons on the right-hand side of HDD Damage frame to set the permissible level of HDD damage (%). HDD is a very crucial element for DVR recording, so set the permissible level within 1% to 2% to assure maximum safety.
- While pressing (+) or (-) button on the rightmost side of Temperature or HDD Damage item, a target value increases or decreases by 10 units.
- Choose 'OK' to confirm the setting.

## 4.2.3 Account

• Please click (+) SYSTEM>Account and the following screen will appear.

Acco	unt		SYS	ТЕМ

	Close

- System Log displays diverse events as below events by specifying the user account that actually has accessed the DVR.
- Setup (Menu) Enter/Exit
- Playback Mode Enter/Exit
- Network Access Enter/Exit
- Archive Success/Fail
- System Start/shut down
- S.M.A.R.T. Check
- NTP Sync/ Server Success/Fail
- Send E-mail Success/Fail
- HDD Format Success/Fail
- Data clear Success/Fail
- USB Upgrade Success/Fail
- DVR Setup Change by Remote
- Before/After Time Adjust
- System Log removal procedure is as follows:

- Execute Clear All Data in SYSTEM>Information>Record and choose 'OK' on the popup dialogue box. Please note that all normal recorded video data are deleted from database.
- Press Factory Reset Switch on the back panel. Please note that the entire menu setup is also defaulted.

#### 4.2.5 Exit

• Please click (-) SYSTEM>Exit and choose 'OK' on the popup dialogue box to exit from the setting.

#### CAUTION

ANY CHANGES MADE IN SETUP ARE APPLIED AFTER EXIT.

#### 4.2.6 Shutdown

 Shutdown is a function to help user safely turn the DVR off. Please use the proper shut down procedure to avoid damaging to our DVR system. Do not remove the power during shut down.

#### CAUTION

DO NOT TURN DVR OFF WITHOUT USING THE PROPER SHUT DOWN PROCEDURE. OTHERWISE, IT MAY CAUSE DAMAGE TO DVR. ALWAYS REMOVE THE POWER AFTER SHUT DOWN.

- Click (↔) SYSTEM>Shutdown and then choose 'OK' on the dialogue box to confirm.
- When user select Shutdown menu, the OSD menu on the screen disappears.
- Reboot the DVR after Shutdown. Turn off the DVR and wait for 5 seconds before restart.

# 4.3 DISPLAY

• Please click (↔) DISPLAY and the following screen will appear.

#### 4.3.1 OSD

• Please click (+) DISPLAY>OSD and the following screen will appear.

- The OSD menu will allow user to configure full features (i.e., on/off every letter and icon) displayed on the screen.
- Letters and icons are divided under System and Camera categories. If click (+) 'All', all items are on/off at once.

#### OSD Margin

- The OSD Margin menu will allow user to adjust the position of OSD (letters) on the monitor. Use it when some of letters are dropped out and invisible on the monitor.
- Adjust Horizontal to change margin between both ends of the monitor on horizontal side and OSD. Margin range is between **0** and **50**, with a larger number representing greater margin.
- Adjust Vertical to change margin between both ends of the monitor on vert 130.
- Vertical side and OSD Margin range is between 0 and 50, with a larger number representing greater margin.
- While pressing (+) or (-) button, a target value increases or decreases by 10 units.

#### **De-Interlace**

• This function changes playback display into Progressive Scan or Interlace Scan. Check (☑) De-Interlace, then frame will display as the Progressive Scan and shows the better picture quality.

#### Transparency

- The Transparency menu will allow user to alpha-blending of OSD menu on the monitor. Transparency is the quality that an object or substance has when user can see through it.
- Transparency range is between 0 and 100; with a larger number representing can see through it. (default 0)
- While pressing (+) or (-) button, a target value increases or decreases by 10 units.

# 4.3.2 Main Monitor

• Please click (+) DISPLAY>Main Monitor and the following screen will appear.

	OK Cancel

- Once it has changed, it will ask to reboot for the new recognition of video out method.
- The default value is NTSC

#### CAUTION

ALTHOUGH USERS TURN ITS SYSTEM SETTING TO DEFAULT, THE ANALOG OUTPUT WILL STAY PREVIOUS OUTPUT METHOD AND NOT EFFECT BY THE DEFAULT SETTING.

# 4.4 DEVICES

• Please click (-) DEVICES and the following screen will appear.

#### 4.4.1 Network

• Please click (+) DEVICES>Network and the following screen will show.

Network	DEVICES
	DDNS Port Notification
Network Type	STATIC
IP Address	192.168.10.88
Subnet Mask	255.255.255.0
Gateway	192.168.10.1
DNS Server	192.168.10.1
	OK Cancel

#### LAN

#### Network Type

- Please click (+) Network Type. When you click (+) the button, it changes alternately to Static (fixed IP) and DHCP (floating IP).
- In Static, user must manually set the static IP address for use.
- Set IP Address, Subnet Mask and Gateway. Please ask your network administrator for more details.
- To input address, please click (+) and execute the keyboard icon on the right-hand side of each frame.

1 2 3 4 5 6 7 8 9 . 0 ←
OK Cancel

• In DHCP, IP Address, Subnet Mask, Gateway and DNS Server will have input automatically.

#### **DNS Server**

- When user set Network Type to DHCP, DNS server will be inputted automatically.
- When user set Network Type to Static, please click (↔) the keyboard icon on the right-hand side of DNS Server frame and manually input the address.

#### CAUTION

NOTE THAT DNS SERVER ADDRESS IS IP ADDRESS OF YOUR COMMUNICATIONS COMPANY NAME SERVER PROVIDING INTERNET SERVICE. IT IS NOT THE IP ADDRESS OF DDNS SERVICE SITE.

#### DDNS

• Please click (+) DDNS and the following screen will appear.

• 'Floating IP system', although being predominantly used over Internet, is very inconvenient for users because its address

varies every time when user access. The best alternative is DDNS (Dynamic Domain Naming System) which uses name (domain name) instead of IP address (numbers). DDNS automatically recognizes ever changing, floating IP addresses, so it will allow easy Internet access.

- Check  $\ensuremath{\boxtimes}$  a checkbox of Use DDNS to use DDNS function.
- As for DDNS Server, dvrdomain.com name will be showing as default.
- As for Port, 95 is shown by default. If '95' is unable, please consult with a product distributor.

Network	DEVICES	
LAN	DDNS Port	Notification
Use DDNS	-	
DDNS Serve		om
Por	123	
Domain Name		
MAC Address		3:01:21
	. 0 ← OK Cancel	Name
	OK Cancel	]

- When user press Get Domain Name button, Domain Name and MAC Address value will automatically display after 10 seconds.
- Choose 'OK' to confirm the setting.

#### Port

• Please click (+) Port and the following screen will appear.

Network	DE	EVICES	
	LAN DDNS	Port Notifi	cation
	Throat Control	Unlimited	3
Fra	ames 3 🖸	Quality Hi	gh 3 🛛 🖸
Port	t Number Setup		
Port		5920	
Port	t Number Setup		

- Network Throat is used for setting a mean transfer speed per unit of time between a client and a DVR.
- Set a proper Network Throat for a current configuration state of the network for the client to be able to playback DVR screen in optimum state.
- User can select whether to use dual streaming or not. (F Type)
- There are total of 14 different network throat controls user may choose. (bps: bit per second) 26 kbps, 128 kbps, 256 kbps, 512 kbps, 1 Mbps, 2 Mbps, 4 Mbps, 8 Mbps, 10 Mbps, 20 Mbps, 40 Mbps, 80 Mbps, 100 Mbps, Unlimited(default).
- A, B and C Type : Ethernet support Max. 100Mbps.
- D, E F and G Type : Ethernet support Max. 1000Mbps.
- Network video transmission speed and quality can be configured by pressing "Frames" and "Quality" buttons as follows.
- Frames : **A, B and C Type** 1, 2, 3, 4, 5, 7, 15 frames for NTSC (1, 2, 3, 4, 5, 6, 12.5 frames for PAL)
  - D, E F and G Type 1, 2, 3, 4, 5, 7, 15, 30 frames for NTSC (1, 2, 3, 4, 5, 6, 12.5, 25 frames for PAL)
- Quality : Std. 1, Std. 2, Std. 3, Std. 4 (standard), High 1, High 2, High 3, Super 1, Super 2, Super 3
- The Port Number Setup menu will allow user to set Administrator and Port Number for Video/Audio and Web Port.
- For Port Number Setup, please get an approval of the network administrator in connection with CMS program.

Port number

- Administrator: 5000~65535
- Video / Audio: 5000~65535
- Web: 1~65535

#### CAUTION

IT IS NOT ABLE TO CHANGE Port Number DURING CMS ACCESS TO DVR.

#### CAUTION

CHANGES BEING MADE ARE APPLIED AFTER COMPLETE SETUP TO EXIT.

#### CAUTION

ONCE PORT NUMBERS ARE CHANGED, IT MUST BE CHANGED THE PORT NUMBERS OF CMS (Central Monitoring Station) PROGRAM AS WELL.

• Choose 'OK' to confirm the setting.

#### Notification

• Please click (+) Notification and the following screen will appear.

Network	. DE	VIC	ES			
	LAN DDNS		Port	Notifi	cation	
	Add E-Mail 🛛 🛱

7	CAM7	-		PELCO-D	0		7	
≥ 8	CAM8			PELCO-D	0		8	
	1/2							
		0	ĸ	Cancel				

- Click (←) the keyboard icon on the right-hand side of each frame on Title column and the virtual keyboard will appear. Then, register titles of cameras.
- If a check box is checked ⊠on No column, a video of the corresponding camera is recorded and displayed on the monitor. However, if user does not check the checkbox, both recording and monitor display stop. Then, DVR picture, instead of a recorded video, will be displayed on the monitor.

#### CAUTION

WHEN USER EXCLUDES A CORRESPONDING CAMERA VIDEO FROM RECORDING AND MONITOR DISPLAY (CHECK A CHECK BOX D), MAKE SURE CHANNELS OF LARGE NUMBERS ARE EXCLUDED FIRST.

- If a check box is checked 🗹 on Covert column, a video is recorded but is not displayed on the monitor.
- Click (+) each frame on PTZ column to select PTZ protocols connected to a corresponding camera.
- Click (+) each frame on Set to set PTZ Settings connected to a corresponding camera.

Camera IPT7	DEVICES		
PTZ Setting			
Baud Rate Data Bit Stop Bit Parity	2400 bps 🐧 5bit 🐧 1bit 🐧 None 🎝	Default	
Menu Tour Pattern	0 ##### 0 ##### 0 #####	Default	
	Close		

- If users click (Default), proper number of selected PTZ will appear automatically. Please choose 'OK' to confirm the setting.
- Menu, Tour and Pattern help user to use OSD function of PTZ camera.
- PTZ camera itself supports OSD menu, use the setup value to more easily enter and use the OSD menu even in DVR.
- If OSD enter command is 95 + PSET for example, designate 95 for Menu item,
- If shortcut key to use Tour function is 71  $\sim$ 79 + PSET, designate 70 for Tour item and
- If shortcut key to use Pattern function is 81 ~ 89 + PSET, designate 80 for Pattern item.
- The setting information herein is used for PAN/TILT control in 5.1.5 (to be described).
- If click Default, basic setup values are given (i.e., Menu: 95, Tour: 70, Pattern: 80).
- For further details on setting, please refer to the PTZ camera manual.
- Click (↔) ▲, ▼ direction buttons on the right-hand side of the ID column to set ID number (i.e., 0 ~ 9999) of each PTZ.
- While pressing (+) or (-) button, ID increases or decreases by 10 units.
- Choose 'OK' to confirm the setting.

# 4.4.3 Audio

• Please click (↔) DEVICES>Audio and the following screen will appear.

Audio	DEVICES

• Choose 'OK' to confirm the setting.

#### Emergency

- Please click (+) Emergency and the following screen will appear Emergency.
- The Emergency menu will allow user to set Emergency videos.
- Each frame on Title column shows camera title registered in DEVICES>Camera/PTZ. User may not change camera titles here.

	ngs	REC	ORD						
	Continuous	Event	Em	ergei	ncy	н	D-SE	ม	
No	Title	Resolut	ion	Fra	mes	Qualit	у	Durati	on
1	CAM1	1280x72	0 🔇	30	0	Super	0	5 Min.	0
2	CAM2	1280x72	0 🖸	15	0	Std.	0	5 Sec.	Q
3	CAM3	720x480	0	30	3	Super	0	30 Sec	0
4	CAM4	1280x72	0 🔇	4	0	High	0	5 Sec.	0
		OK	C	ance	1				

- Click (←) each frame on Resolution column to select recording resolution of a corresponding camera. User may select its resolution from 360x 240(288), 720x240(288), 720x480(576), 1280x720 and 1920x1080.
- Click (←) each frame on Frames column to select recording rate of a corresponding camera. Recording rate varies by camera. Below lists the maximum recording rate of each camera.

	360x 240(288)	720x240(288)	720x480(576)	1280 x 720	1920 x 1080
4 Channel DVR	120(100)	120(100)	120(100)	120(100)	120(100)

- Click (↔) each frame on Quality column to select recording quality of a corresponding camera. User may select its recording quality from **Super, High and Std**.
- Click (+) each frame on Duration column to select recording duration (i.e., **1 second ~3 hours**) of a corresponding camera.
- User may change the setting values of Resolution, Frames, Quality and Duration at a time by clicking the menu tab.
- Choose 'OK' to confirm the setting.

#### HD-SDI

• User shall adjust its resolution for HD-SDI camera input depending on its camera supports.

Setti	Settings RECORD						
	Continuous	Event	Emergency	HD-SDI			
No	Title		HD-SDI I	nput			
1	CAM1		720p 6	50			
2	CAM2		1080i (	50	÷.		
3	CAM3		720p 6	50			
4	CAM4		720p 6	50			
		ок	Cancel				

• User can select the input standard from 720P 24, 720P 25, 720P 30, 720P 50, 720P 60, 1080I 50, 1080I 60, 1080P 24, 1080P 25, 1080P 30, 1080P 50, 1080P 60.

Setting	\$	RI	ECORD	-		
	Continuous	Event	Emerger	псу	HD-SDI	
No	Title		HC	D-SDI Inp	ut	
1	CAM1			720n 60		
2		1. i ii i				
4		nis wii make	system reboo	t procee	d'?	▲ ▼
		ОК	Cance			
		ОК	Cance			

When the HD-SDI input changed manually, DVR will start restart to apply changed resolution.

#### CAUTION

ALTHOUGH USERS TURN ITS SYSTEM SETTING TO DEFAULT, THE ANALOG OUTPUT WILL STAY PREVIOUS OUTPUT METHOD AND NOT EFFECT BY THE DEFAULT SETTING.

# 4.5.2 Schedule

- Please click (+) RECORD>Schedule.
- Each weekday is composed of 24 'Time blocks'. Each block represent 1 hour.
- Click (+) Camera frame to select Camera No. 1.
- Please set the recording mode as follows:
- ① Mark a check box the desired recording mode in the schedule (i.e., Continuous, Alarm, Motion and PreAlarm)). If user wants to stop recording, please clear all check boxes.
- ② Click block, row, column or all (square box) to register desired recording mode.
- Click (+) a block and only the block will be registered.
- Click (+) a row (S~H) and the entire row will be registered.
- Click (+) a column (00~23) and the entire column will be registered.
- Click (+) a square box (top-left side between 'S' and '00') and all the rows/columns will be registered.

- Repeat the procedure for Camera Nos. 2 to 16. If user wants every camera to have the same mode, please click (+) Copy to All Camera.
- Below lists symbols of the respective recording modes.

🞽 Alarm In / Continuous

Alarm In / PreAlarm

Motion

#### (NOTE)

Holiday (H) registration is done with a separate menu.

# 4.5.3 Pre Alarm

#### A, B, C, D, E and F Type

- Please (↔) RECORD>Pre Alarm and the following will appear.
- Pre Alarm is effectively used when user selected recording mode by Alarm or Motion.
- The Pre Alarm will allow user to check, during playback, the previously recorded video before the record start time.

Pre Ala	ırm	RECOR	Ð

- The Motion Detection menu will allow user to set Motion detection alarm.
- Press SETUP key (or right mouse button) and the SETUP menu will appear.
- SETUP menu descriptions.
- **Camera:** select camera for setup.
- Sensitivity: select sensitivity (Low, Normal and High)
- Reverse Vert: activate the entire column at the cursor's position.
- Reverse Horz: activate the entire row at the cursor's position.
- Select All: active all blocks.
- Deselect All: deactivate all blocks.
- Copy to All Cameras: The present channel setup applies to all other cameras. Only when click save button, the changed setup can be saved.
- Save: save the new settings and go back to previous menu (page).
- Exit: ignore the new settings and go back to previous menu (page).
- Cancel: cancel Motion Setup menu.
- Choose 'OK' to confirm the setting.

### 4.5.5 Holiday

• Please click (+) RECORD>Holiday and the following screen will appear.

- The Holiday menu will allow user to register holidays. Please follow the registration procedure below.
- 1 Use arrow buttons in the Month Calendar to select Year and Month of holiday to be registered.
  - **>>**: search subsequent 'Year'
  - **4**: search previous 'Year'
  - ►: search subsequent 'Month'
  - ◀: search previous 'Month'
- 2 Click (+) on date user need to register as holiday.
- ③ Click (↔) ADD button and the date just clicked on will be copied to the Schedule frame for registration.
- ④ If wish to cancel the registration of a certain holiday, please click 🗵 button next to the Schedule frame.
- Since holidays may vary every year, we recommend user to update on a regular basis.
- Choose 'OK' to confirm the setting.

# 4.6 LINK

• Please click (↔) LINK and the following screen will appear.

• The LINK menu will allow user to set recording modes of all kinds of alarms (Sensor, Motion Event, Video loss, System Event, etc.), alarm output, e-mail notification and the like.

#### 4.6.1 Alarm In

- Please click (+) LINK>Alarm In and the following screen will appear.
- Select cameras for recording while the motion sensor is in operation and alarm outputs and set up E-mail addresses for notification.
- Link Notification displays E-mail addresses registered in DEVICES>Network>Notification.
- Please follow the setup procedures below.
- ① Click (+) Alarm In frame and select Alarm In 1.
- ② Select cameras for recording when Alarm In 1 is on. Please check ☑ a check box under Link Camera. More than two cameras can be set.
- ③ Select alarm outputs to be worked when Alarm In 1 is on. Please check ☑ a check box under Link Alarm Out. More than two alarm outputs can be set.
- ④ Select E-mail addresses for notification when Alarm In 1 is on. Please check ☑ a check box under Link Notification. More than two E-mail addresses can be set.
- ⑤ Repeat the above procedure for Alarm In 2~ Alarm In 16 (Up to 2 for A Type / UP to 4 for B Type / Up to 16 for C, D, E and F Type).

· Choose 'OK' to confirm the setting.

#### 4.6.2 Motion Event

• Please click (↔) LINK>Motion Event and the following screen will appear.

- Select cameras for recording while the motion sensor is in operation and alarm outputs and set up E-mail addresses for notification.
- Link Notification displays E-mail addresses registered in DEVICES>Network>Notification.
- Please follow the setup procedures below.
- ① Click (-) Motion Event frame and select Motion Event 1.
- ② Select cameras for recording when Motion Event 1 is on. Please check ☑ a check box under Link Camera. More than two cameras can be set.
- ③ Select alarm outputs to be worked when Motion Event 1 is on. Please check ☑ a check box under Link Alarm Out. More than two alarm outputs can be set.
- ④ Select E-mail addresses for notification when Motion Event 1 is on. Please check ☑ a check box under Link Notification. More than two E-mail addresses can be set.
- (5) Repeat the above procedure for Motion Event 2~ Motion Event 16.
- Click() By Duration box to set up the recording duration and prevent recording caused by event.
- The duration time can be controlled by previous setting mode: RECORD>Settings>Event
- Choose 'OK' to confirm the setting.

#### 4.6.3 Video Loss

• Please click (↔) LINK>Video Loss and the following screen will appear.

- Select cameras for recording while the motion sensor is in operation and alarm outputs and set up E-mail addresses for notification.
- Link Notification displays E-mail addresses registered in DEVICES>Network>Notification.
- Please follow the setup procedures below.
- 1 Click (+) Video Loss frame and select Video Loss 1.
- ② Select cameras for recording when Video Loss 1 is on. Please check ☑ a check box under Link Camera. More than two cameras can be set.
- ③ Select alarm outputs to be worked when Video Loss 1 is on. Please check ☑ a check box under Link Alarm Out. More than two alarm outputs can be set.
- ④ Select E-mail addresses for notification when Video Loss 1 is on. Please check ☑ a check box under Link Notification. More than two E-mail addresses can be set.
- ⑤ Repeat the above procedure for Video Loss 2~ Video Loss 16.
- Click No Beep ☑ to deactivate alert sounds from video loss. Apply to all channels.
- Choose 'OK' to confirm the setting.

# 4.6.4 System Event

• Please click (+) LINK>System Event and the following screen will appear.

- Select recording cameras and alarm outputs while Emergency recording using **EMERGENCY** key and set E-mail addresses for notification.
- Link Notification displays E-mail addresses registered in DEVICES>Network>Notification.
- Please follow the setup procedures below.
- ① System Event frame displays Emergency, which user does not have to change.
- ② Select cameras for recording when emergency occurs. Please check ☑ a check box under Link Camera. More than two cameras can be set.
- ③ Select alarm outputs to be worked when emergency occurs. Please check ☑ a check box under Link Alarm Out. More than two alarm outputs can be set.
- ④ Select E-mail addresses for notification when emergency occurs. Please check ☑ a check box under Link Notification. More than two E-mail addresses can be set.
- · Choose 'OK' to confirm the setting.

#### 4.6.5 Popup Link

• Please click (+) LINK>Popup Link and the following screen will appear.

- When Motion or Alarm-In is detected, user can select a popup or beep sound for warning, or have a particular channel of interest to pop-up on Spot Screen.
- Please follow the setup procedures below.
- ① Select camera
- O **Popup**: Please Check  $\blacksquare$  a check box under making the popup screen for main monitor.
- $\bigcirc$  **Beep**: Please Check  $\square$  a check box under making beep sound.
- 4 **Spot**: Please Check  $\blacksquare$  a check box under making the popup screen for spot monitor.
- Click Copy to All Cameras button, then the present channel setup will apply to all other cameras.
- Choose 'OK' to confirm the setting.

# 5. OPERATION INSTRUCTION

# 5.1 Viewing

# 5.1.1 First Image

• Power on DVR and the following live video will appear, while viewing and recording at the same time.

• The screen will display date/time and icons below.

lcon	Description				
٩	Continuous recording mode				
*	Event recording mode (Alarm In/Motion)				
	In recording				
11	PTZ registration/PTZ mode				
\$	In Audio recording				
	CMS Access Indication/No. of accesses (up to 4)				
	In channel sequencing				
0	Setup in HDD Overwrite mode				
01	Setup in HDD None Overwrite mode(recording)				
Q1	Setup in HDD None Overwrite mode(HDD Full)				

• On the right bottom side of the screen, disk usage will show by %.

• On the left top side of each channel screen, 🚳, 🖤, 💦 🛑 , 🔜 icon will show as its operation.

• At the normal state, HDD Overwrite mode is on and 🚺 icon shows.

• When Overwrite mode is off (see 4.2.1 Information>Record>Overwrite Setting), will show. And when the disk

becomes full, the icon will be changed to

- Click Emergency recording button, 🔎 icon will show.
- Click Audio button, 🔟 icon will show. And click channel button, then user can change only audio channel.

# (NOTE)

When front key does not work well, please check whether the audio icon 🖤 is activated on the screen

# 5.1.2 View Format

- The available view formats when the Main Monitor is in viewing mode include Full Screen, Split Screen, Channel Sequencing Screen and PIP screen.
- Full Screen: Please press camera select key (1~16) to view the corresponding camera image in full view format.

#### (NOTE)

Using a mouse: Double click to view the corresponding camera image in full view format and click one more time to back to Split Screen.

- **Split Screen:** Please press **DISPLAY** key and the available split screens (or multi-window view formats) will display alternately (i.e., 2x2, 3x3 and 4x4).
- Channel Sequencing: Please press SEQUENCE key to display images in sequencing view format periodically. This automatic sequence function is not limited to the full screen format, but can be used in any view mode. In 8 channel DVR, 4-camera sequencing view mode is possible and in 16 channel DVR, 4 or 9-camera sequencing view modes are possible.

# 5.1.3 Digital Zoom

#### A, B, C, D, E and F TYPE

- Select a full screen mode.
- Activate mouse menu with right click at live mode and click ZOOM.
- Use direction keys to view certain parts on the zoomed screen.
- The digital zoom function works only in the full screen. Please do not use the digital zoom function in split screen format, channel sequencing mode or PIP mode.

#### G TYPE

- Select a full screen mode.
- Activate mouse menu with right click at live mode and click ZOOM.
- Drag a portion to zoom by mouse.
- Double click the mouse to exit zoomed screen.
- This function works only in the full screen. Please do not use the digital zoom function in split screen format, channel sequencing mode or PIP mode.

#### (NOTE)

Digital zoom is only controlled by mouse.

#### 5.1.4 Freeze Live Image

- Press FREEZE key while viewing live image to pause the image.
- The Freeze function works only in the full screen or split screen formats. Please do not use this function in channel sequencing mode or in PIP mode.

# 5.1.5 Pan / Tilt Control

• Press PTZ key to adjust PTZ cameras connected to DVR. Pan/Tilt mode is available only in the full screen format.

• In Pan/Tilt mode, the 🐨 icon is displayed on the bottom of the screen.

• Following is the key usage found in Pan/Tilt mode.

Кеу	Function
▲, ▼, ◄, ►	Up/Down/Left/Right rotation
<b>.</b>	Zoom out
•	Zoom in
⊳	Focus near
	Focus far
Q	Iris Close
$\circ$	Iris Open
<b>X</b>	Save Preset
*	Go to the Preset
Menu	Go to OSD main menu
Tour	Run Group Tour 1~9
Patt.	Run Pattern 1~9

• To use a mouse in Pan/Tilt mode, please move the cursor to the lower portion near the center of the screen. To use front button in Pan/Tilt mode, please push setup button. A key pad control will show as follows:

- To save current camera number, select Preset No and X button click.
- To move to preset, select preset No and + button click.
- Available 1 ~ 255 Preset numbers can saved it depends on camera specification.
- As explained earlier in 4.4.2., press Menu button to pop-up PTZ camera OSD setup screen and set up Tour and Pattern

items.

- Since these functions make use of a memory function of the camera itself, user should set them in Camera OSD.
- Once user completes the setup, close the Camera OSD menu.
- User can conveniently use Tour and Pattern functions simply by clicking Tour and Pattern buttons.
- Particulars on how to setup each function on OSD Menu are found in the manual of a corresponding camera.

#### (NOTE)

Suppose a command for using Tour function is  $71 \sim 79 + PSET$  and if you had set Tour to 70, use Preset No:  $1 \sim 9 + Tour$  button to benefit the Tour function ( $70 + 1 \sim 9$ ).

# 5.1.6 System Log

• Press **EVENT** key and the System Log screen will appear.

System Log	SYSTEM
Date/Time 2007/11/20 14:40:03 2007/11/20 14:39:32 2007/11/17 13:31:59 2007/11/17 13:31:10 2007/11/16 09:54:07 2007/11/16 09:57:13 2007/11/16 19:34:21 2007/11/13 17:18:24	Log Setup Exit Setup Enter Setup Exit Setup Enter System Start System Shutdown Setup Enter Setup Enter
1 / 125 ( 1000 )	
	Close

• Please refer 'SETUP>SYSTEM>System Log' to learn different events listed on the System Log and see how to delete the System Log.

# 5.1.7 Key Lock

• Press AUDIO>FF>FORWARD keys in sequence to operate the key lock function. This function is indicated by 🙆 icon in

the lower portion on the right-hand side of the screen.

• Once the Key Lock function is activated, user cannot use any key. If wish to use a key, please enter the correct password to release the key lock function. If Password is not required, simply press ENTER ← key.

# 5.1.8 Emergency Recording

- When user presses EMERGENCY key, recording starts right away regardless of preset recording mode.
- · Emergency recording is not operated while SETUP.
- Press Emergency key one more time to stop the emergency recording.

# 5.2 Search

- This involves searching recorded video to playback the wanted video of a specific date and time.
- Press **SEARCH** key on the viewing screen, or Click Search menu at "Function Keys" and the following Search menu will appear.

- There are three ways to search video, i.e., by date/time and by calendar.
- Date/Time Search: search by inputting date/time.
- Calendar Search: search by using calendar.
- Event Search: search by event.

#### 5.2.1 Date / Time Search

• Please click (+) Date/Time Search in SEARCH menu and the following input box will appear.

Enter D	ate/Time					
Date	2007	1	08	1	01	
Time	16	:	48	1	42	

- Follow the procedure below to search video by date/time.
- ① Click (←) the date and/or time whichever user needs to change and block the item. The designated item will be marked in a square.
- ② Click ▲, ▼ buttons on the right-hand side to adjust the values.
- Choose 'Search' to confirm the setting. Then, the selected video will be played back.
- Playback continues from the designated time until the last recording time.

# 5.2.2 Calendar Search

• Please click (+) Calendar Search in SEARCH menu and the following input box will appear.

- Dates and Time with recorded data available will be high-lighted.
- Follow the procedure below to search video by calendar.
- ① Select Year and Month by using the arrow buttons in the calendar.
  - >>: search subsequent 'Year'
  - - Search previous 'Year'
  - ►: search subsequent 'Month'
  - ◀: search previous 'Month'
- O Click (+) a date. The date will be displayed in black color.

- ③ Click (↔) the box on the time indication bar to select the search time. The selected time zone will be focused in different color.
- ④ Click (+) the selected time box to show pop-up window on the screen, If there is a recorded data.

Ca	lendar					s	EARC	н						
			•			20	008 <i>  1</i>	10		►	₩			
						S	EARC	н						
	Cam	era		1				2008	-10-2 <sup>-</sup>	1 (21)	-1)			
	0	5	10	15	20	25	30	35	40	45	50	55	60	
				[	Sea	arch	] [	Can	icle	]				
	0	2	4	6	8	10	12	14	16	18	20	22	24	
				[	Sea	ırch	] [	Can	icle	]				

5 The screen will show selected date/time.

- ⑥ Click ▲▼ button for selecting cameras. <- 폰트 다름
- ⑦ Selected camera will show the time bar 0-60 and It will be marked on 2.5minutes basis during selected time zone.
- 8 Click (+) the box on the time indication bar to select the start time of the video playback
- Click (내) 서치 아이콘 Search to start playing back the selected video.
- Playback continues from the designated time until the last recording time.

#### (NOTE)

 $\bigcirc$  Click (+) search button to show entire channel search based on different time frames

#### 5.2.3 Event Search

- Please click (←) Event Search in SEARCH menu and the following input box will appear.
- This involves searching recorded video to playback the selected video of a specific date and time.
- Press SEARCH key on the viewing screen, or use the mouse wheel (central button) and the following Search menu will
  appear.

- 1 Designate Event Search start time.
- ② Designate Event Search end time.
- ③ Select camera (video) to search data.
- ④ Check a check box (Motion / Alarm In / Emergency / Serial In) Check box.
- 5 Click on Search Index button to recorded search event data.

# 5.3 Playback

- This involves searching recorded video to playback the wanted video of a specific date and time in search mode.
- Press SETUP key or please press the mouse right button and click in Playback mode. Then, the following screen will appear.

- There are three ways to search video, i.e., by date/time and by calendar.
- Date/Time Search: search by inputting date/time.
- Calendar Search: search by using calendar.
- Event Search: search by event.
- There are three other functions in playback mode;
- Archive: The Archive function will allow user to copy the recorded video (moving images and still images) from a storage device (USB memory stick, DVD-RW).
- Exit Search: From playback display to live display.
- Cancel: Hide menu in playback mode.
- Playback mode runs in the available maximum number of split screen format. To change the viewing mode, please press **DISPLAY** key or **Camera Select** key (1~16).

#### (NOTE)

Using a mouse: Double click to view the corresponding camera image in full view format and click one more time to back to Split Screen.

- Move the cursor of the mouse and the keypad control will appear at the bottom near the center of the screen.
- Every time user presses the **PLAY/PAUSE** key during playback mode, it is changed to '1X PLAY' and 'PAUSE'. The displayed sign on the screen also changes from ► to **II**.
- Following is the key usage found in playback mode. User may also use the keypad provided on the screen.

Go to Start		Go to start of recorded data
REW	₽	<ul> <li>Fast reverse playback (changes to x2, x4, x8, x16, x32, x64 and Extreme with each press)</li> </ul>
BACKWARD	<b></b> ∎	Frame-by-frame reverse still image playback
PLAY		• Playback mode: 1X PLAY
PAUSE	П	• PAUSE
FORWARD	IÞ	Frame-by-frame forward still image playback
FF	•	• Fast forward playback (changes to x2, x4, x8, x16, x32, x64 and Extreme with each press)

• Press SEARCH key to stop playing back video.

# 5.4 One-touch Playback

• Press the **PLAY/PAUSE** key or double click the mouse wheel (central button) in the viewing mode. Then, user will be able to view the wanted recorded video right away without going through the search procedure. The video plays back the recorded video from the last one minute. To stop playing back the video, please press **SEARCH** key.

# 5.5 Digital Zoom in Playback

- Users are able to use Digital Zoon function in full screen playback.
- Drag a partition on to the screen, then the partition will enlarge as a full screen.
- Double click the left button of mouse to exit the zoom-in screen.

#### (NOTE)

Digital zoom is only controlled by mouse.

# 5.6 Archive

- The Backup function will allow user to copy the recorded video (moving images and still images) from a storage device (USB memory stick, DVD-RW).
- Please execute Backup Live or playback.
- Follow the backup procedure.
- ① Press **ARCHIVE** key. In case of using a mouse, please press the mouse right button and click in Archive. Then, the following screen will appear.

Archive	SEARCH
Format	EXE 💽 4169 MB
From	2007/11/21 09:31:18
То	2007/11/21 09:45:18
Destination	USB 🐧
File Name	
Camera	□1 🗹 2 □3 □4 □5 □6 □7 □8
	9 10 11 12 13 14 15 16
	Start Cancel

- ② Click (+) Format frame to select EXE or JPEG. Choose EXE for storing moving images; and JPEG for still images.
- ③ Click (---) the keyboard display on the right-hand side of FROM frame to set the storage start time.
- ④ Click (↔) the keyboard display on the right-hand side of TO frame to set the storage end time.
- ⑤ Click (←) Destination frame to select a storage device out of USB and DVD-RW.
- ⑥ Click (↔) the keyboard display on the right-hand side of File Name frame to input a file name. User does not need to input extension (exe, jpeg). Please note that the file is not going to be stored unless user inputs a name.
- ⑦ Check ☑ a check box next to a camera with the video that want to store. User can archive multi channel at the same time.
- ⑧ Click (↔) the Calculator button I on the rightmost side of Format line to check the data capacity for backup. The capacity will show only for EXE Archive.
- ⑨ Click (↔) Start button. Then, Progress bar will appear and the storage process proceeds. The progress bar does not show actual progress time. Depending on to the file size, it will appear again even after it shows 100%. It is important not to detach storage device until DVR displays "Archive Success" message.
- 10 If the storage is done properly, Archive Success message will pop up. Please choose 'OK' to confirm. If the storage fails,

Archive Fail message will pop up. In this case, user must try again.

#### (NOTE)

PLEASE DO NOT USE JPEG FORMAT SELECTING WHILE ARCHIVING IN LIVE MODE.

#### (NOTE)

PLEASE DO NOT CHANGE THE SETTINGS BY DVR OR CMS, WHILE BACKUP.

#### (NOTE)

WHEN THE TARGET FILE SIZE IS OVER 2GB, PRESS "Start "BUTTON ON THE RIGHT AGAIN AFTER THE FIRST "ARCHIVE SUCCESS". AND DVR WILL CONTINUE TO ARCHIVE TO ANOTHER FILE WITH THE EXTENSION OF "-002" AUTOMATICALLY ADDED. IN CASE OF DVD MEDIA, CHANGE IT AFTER THE FIRST FILE IS FINISHED AND PRESS "Start "TO CONTINUE TO THE REST OF PROGESS.

#### CAUTION

PLEASE DO NOT USE THE SPACE WHEN ENTER BACKUP FILE NAME.

#### CAUTION

WHILE BACKUP PROCEDURE, PLEASE DO NOT DETACH STORAGE DEVICE OR POWER OFF THE DVR. OTHERWISE, IT MAY CAUSE PERMANENT DAMAGE TO THE DVR OR THE STORAGE DEVICE. IN SUCH CASE, USER MUST REBOOT THE DVR. IF THE DVR DOES NOT OPERATE PROPERLY, USER MIGHT NEED THE RECOVERY FILE SYSTEM PROGRAM OR MUST IMPLEMENT FORMATING THE HDD.

# 5.7 Menu Bar

• Menu bar enables users to control all function as front button on the OSD screen.

間 ☆ 4 107 1 9 16 SP 2010/07/14 Move the mouse cursor to bottom around Date and Time indication then Menu bar will show up on the live screen. Each icon functions as below: : Exit the Menu Bar : Safely turn off the DVR : Enter Archive mode : Enter PTZ control mode : Enter Setup mode Turn the display as 1 channel full screen. Additional click on full screen, it will change to next channel in sequence. : Turn the display as 4 channels split screen, Additional click on quad-screen, it will change to the next four channels in sequence 9 : Turn the display as 8 channels split screen, Additional click on 8 channels split screen, it will change to the next eight channels in sequence. 16 | : Turn the display as 16 channels split screen, There is no changes when additional click on 16 channels split screen. : Activate the Sequence as configured on spot monitor Setup menu.

: Displayed channel on Spot monitor 1 can be changed by clicking the wanted channel. Sequence stops at "SP1"

mode.

# 5.8 Color Control and Position

• Please click (↔) Color /Alarm in SEARCH menu and the following input box will appear.

#### (NOTE)

THIS FUNCTION IS ENABLED ONLY WHEN LIVE MODE AND 1 CHANNEL MODE

- If user clicks (**Default**), proper number of Color Control or HSTART/VSTART will appear automatically. Please choose 'OK' to confirm the setting.
- Click (←) ▲, ▼ direction buttons on the right-hand side of Brightness/Contrast/Saturation to set adjust color of the screen (i.e. 0 ~ 255)
- Click (↔) ▲, ▼ direction buttons on the right-hand side of HSTART / VSTART to set adjust display poison.
- If user wants every camera to have the same mode, please click (+) Copy to All Camera.
- Choose 'OK' to confirm the setting.

# 5.9 Alarm Out Control

• Please click (+) Color / Alarm in SEARCH popup menu or in front panel and the following input box will appear.

### (NOTE)

THIS FUNCTION IS ENABLED ONLY WHEN LIVE MODE AND 4 SPLIT SCREEN MODE OR HIGHER.

#### (NOTE)

ONLY 4 ALARM CONTROLS ARE AVAILABLE FOR TYPE B,D AND G.

• Please click (+) Color / Alarm in SEARCH popup menu or in front panel and the following input box will appear.

• Choose 'Close' to confirm the setting.

# CMS (Central Monitoring Station)

# **User`s Manual**

This document contains preliminary information and is subject to change without notice.

# 6. PROGRAM INSTALLATIONS

# 6.1 System Recommendations

• Power on DVR and the following live video will appear, while viewing and recording at the same time.

- Processor: Intel Pentium(R) (at 2.8GHz or higher)
- Memory: 1.00GB or more
- Video: 128 MB AGP VGA card, 1024 x 768 Resolution, 32-bit Color, DirectX® 8.1 version or later
- HDD Space: 500 MB of space
- Monitor: SVGA or XGA, 1024 x 768 Resolution, 32-bit Color
- OS: Windows® 2000 (SP4) or Windows XP only

# 6.2 Program Installation Method

- Please follow the program installation procedures below.
- ① If an old version of CMS program was installed, completely remove or delete the old version.

#### CAUTION YOU SHOULD COMPLETELY REMOVE CMS PROGRAM OF AN OLD VERSION BEFORE INSTALLING NEW VERSION TO REDUCE COLLISION.

- ② Insert CD in DVD-RW.
- ③ Run the CMSSetup.exe file.
- ④ When the following screen appears, click Next.

🐻 Setup - CMS	
	Welcome to the CMS Setup Wizard This will install CMS on your computer. It is recommended that you close all other applications before continuing. Click Next to continue, or Cancel to exit Setup.
	Next > Cancel

(5) When the following screen appears, select folder and click Next.

1🕏 Setup - CMS
Select Destination Location Where should CMS be installed?
Setup will install CMS into the following folder.
To continue, click Next. If you would like to select a different folder, click Browse.
C:\Program Files\CMS Browse
At least 9.9 MB of free disk space is required.
< <u>Back</u> Next> Cancel

6 When the following screen appears, select folder and click Next.

O When the following screen appears, click Install.

 $\circledast$  When the following screen appears, click Finish to complete the installation.

# 6.3 Login

After install CMS software, CMS icon below appears on desktop.

EMS

• Please double click on the icon to execute the program.

# 7. FUNCTION AND INSTRUCTIONS

Map File Name File Open					
Popup Display					
🗖 Event Popup View 🔽 Beep 🔽 Covert On					
Add Site Delete Site					
Ok Can	el				

### Remote Site Connection Setup

- <u>Site Name</u>: input DVR site name to be displayed on the right-hand side of DVR icon. Please note that this name has nothing to do with the ID registered in DVR. User may create a name that is fairly easy to distinguish.
- IP Address/Domain Name: input IP address or Domain Name of DVR (check with SETUP>DEVICES>Network in DVR).
- <u>Command Port:</u> input Administrator's number among port numbers set in DVR (check with SETUP>DEVICES>Network in DVR).
- <u>Stream Port</u>: INPUT Video/Audio number among port numbers set in DVR (check with SETUP>DEVICES>Network in DVR).
- <u>Re-connect when abnormal disconnected</u>: When the CMS has abnormally disconnected, it automatically verifies the network condition, then tries reconnecting to designated site.
- Scan DVR
- This function automatically detects and registers units currently connected to local networks.
- Click "Scan DVR", then following will pop up.

VR Scan				E
IP	Admin	Stream	MAC Address	
	1		1	1
	Scan DVR	Add Site	E×it	

- Click "Scan DVR" button then IP address of DVR will be listed which is currently connected with PC in the network.
- Select the IP address and click "Add site" then the connected DVR is automatically registered in the CMS.

### Camera Name

- It helps to set the camera name in CMS program other than DVR camera name.
- Click "Camera Name" then follow will appear.

Camera nam	e setup				
Current Site	192.168.10.173		•		
Camera name s	elect				
۲	by DVR setting	C by C	MS setting	C Both	
Camera Name -					
Camera 1			Camera 9		
Camera 2			Camera 10		
Camera 3			Camera 11		
Camera 4			Camera 12		
Camera 5			Camera 13		
Camera 6			Camera 14		
Camera 7			Camera 15		
Camera 8			Camera 16		
Clear	all names			OK Save	Cancel

- Select one site by clicking "Current Site".
- Choose camera name between DVR and CMS setting or both.
  - By DVR setting : Display camera name of DVR.
  - By CMS setting : Display Camera name of CMS.
  - Both : Display both as [DVR name]-[CMS name].
- Type the name of each cameras in "Camera Name" item. It is not available when select displaying DVR name only.
- It is possible to erase all names by clicking "Clear all names".
- Click "Save" to save the setting.
- Save and close the setting panel by clicking "OK".
- Exit without saving by clicking "Cancel".
- Remote Site Login Setup: Input ID and Password.
- Please do not input ID and Password if wish a popup window for logon ID and password to appear at the time of connection to CMS.
- Please input ID and Password if wish to connect directly to CMS without ID and password verification.
- ID and Password should be coincident with those of DVR. If Password for DVR has not been set up, enter ID only (check with DVR: SETUP>SYSTEM>Account>User in DVR).
- Transfer Camera Select enables user to set the kind of channel(s) that show during the initial connection.
- Add Site: Click this button to add DVR site. User may be able to register up to 256 DVR site.
- Delete Site: use this button to delete the already registered DVR site(s).
- E-map Setup: Use this to upload saved E-map image file (see 10.2 E-map).
- Popup Display: Setup for beep and popup displays when event input.
- Beep: Beep when event occur.
- Covert On: Tick the box off, then it shows the covert screen.
- Please choose 'OK' to confirm the setting.

## 8.3 Live Video

### 8.3.1 Network Connection

- As the setup is completed, user should connect CMS to DVR over Network.
- Please click in REMOTE DVR on the screen.
- **\_\_\_\_** It will turn to blue, while being activated.
- Please click REMOTE CONNECT button.
- If a popup window for ID/Password appears, please input ID/Password. The window may not show up at all depending on Remote Site Login Setup.

(NOTE)
If there is no Admin Password set up in DVR, user may log-in to Admin for CMS and enter without Password.

### (NOTE)

Before network connection, be sure that HDD is installed. Otherwise, the DVR will not be connected over network.

Remote Lo	gin	×
ID		
Password		
	OK Cancel	

- If video does not display, please check Local Setting again.
- Site Tree of DVR will show with the video. Site Tree lists DVR sites being currently connected to the CMS.
- This is Live video of the connected DVR.
- User can connect maximum 16 sites simultaneously.
- If user clicks Remote Disconnect, interface with a site is disconnected.

• To connect another DVR, please press REMOTE DISCONNECT button to disconnect the current DVR and connect the new DVR.

If wish to exit CMS program, click on Exit CMS button.

• The list below describes functions of each part of the screen.

1	Tool Bar
2	Watch Mode
3	Date/Time LED
4	Site Tree (DVR and Channels)
5	Color Control Bar
6	Instant Record Button
7	System Log
8	Alarm Out Channels
9	Audio Channels
10	Two way Audio
11	Video Display Screen
12	Network Connect/Disconnect Button/Exit CMS

### 8.3.2 Watch Mode

• The first image (or the initial image) shows the available maximum split screen format, but user is able to select a watch mode among below modes.

• **Full Screen Mode:** Select a channel and click on FULL SCREEN button. Then, the corresponding channel will display in Full Screen.

(NOTE) A selected channel is outlined in red.	

- Quad Screen Mode: Click on QUAD SPLIT button and a quad screen will display. The quad screen is in combination of 1~4, 5~8, 9~12 and 13~16. If user selects Channel No. 7 and click the button, 5~8 quad screen will display. Similarly, if user selects Channel No. 16, 13~16 quad screen will display.
- **9-Split Screen Mode:** Click on 9-SPLIT button and 9-split screen will display. The 9-split screen is in combination of 1~9 and 8~16. If user selects Channel No. 9 and click the button, 1~9 split screens will display. Similarly, if user selects Channel No. 10, 8~16 split screens will display.

**16-Split Screen Mode:** Click on 16-SPLIT button and 16-split screens will display.

36-Split Screen Mode: Click on 36-SPLIT button and 36-split screens will display.

64-Split Screen Mode: Click on 64-SPLIT button and 64-split screens will display.

**Zoom Mode:** Click on Zoom button. Then, the setup screen will disappear and only the video image will be zoomed

(scaled to fit the screen). To cancel, please press the right mouse button.

#### EE Emap

### E Map: load and close E Map image program.

• Mouse Double Click: If user does double click of the mouse on a split screen, it will turn to full screen mode. Double click the mouse to back to the previous watch mode.

### 8.3.3 Multi Screen

- CMS supports multi remote site connections simultaneously.
- Server Drag & Drop: Drag & Drop Remote Site of site tree to any screen. Then all cameras of the site will display sequentially.
- Camera Drag & Drop: Drag & Drop a camera of Remote Site to any screen. Then the camera will display.

### 8.3.4 Screen Color Adjustment

- Adjust color of the screen using three bars (Brightness / Contrast / Saturation). Selecting a channel and dragging the bar(s) with a connected mouse. Color will change in about 7 seconds.
- Click on UNDO button to return to the original colors.

## 8.3.5 Audio

- Click an audio channel to listen to the corresponding channel.
- User may adjust the audio volume with a mouse.
- · Click a MIC Icon to use to two way audio.

### 8.3.6 System Log

LOG

Click on LOG button on Watch screen. This will allow user to check System Log of Remote Site (DVR).

Туре	Date/Time	Description

OK	Cancel

- When user completes the inputting, please choose 'OK' to confirm.
- Press LOG button to go back to Live video.

## 8.5 Health Check

• This function allows user to check operating status of each unit in DVR connected to CMS.

Health

3

Click on Health Check button in Watch mode and the following screen will appear.

• The list below describes functions of each part of the screen.

1	CMS connections (up to 4)
2	Camera connections and operating status
3	HDD connection and its operating status
4	Recording status
5	Motion recording status
6	Alarm In connection and operating status
7	Alarm Out connection and operating status
8	Version
9	Recording start/end date and time

#### 8.5.1 **Camera connections and Operating Status**

#### 8.5.2 **HDD** connections and Operating Status

#### **Recording Status** 8.5.3

#### **Motion Recording Status** 8.5.4

#### **Alarm In Connection and Operating Status** 8.5.5

Camera is in normal operation. Recording is stopped.

## 8.5.6 Alarm Out Connection and Operating Status

## 8.6 Remote Setting

- User may change DVR's Menu setup through CMS.
- Remote Setting works only in Watch mode.
- FF Remote

Click on REMOTE SETTING button in Watch mode and the following SETUP menu same as DVR's will appear on CMS screen.

- The setup procedure is same as that of DVR.
- When the setup is completed, do not click Exit button on the SETUP screen, but click OK or Cancel button on the Remote Setup screen.

# 9. SEARCH MODE

## 9.1 Search Screen

- This menu is for playing back recorded data.
  - Click on REMOTE SEARCH button in Watch mode and the following Screen mode screen will appear.
- Search mode provides three search functions. One is for searching DVR video by clicking REMOTE SEARCH button and another is for searching video stored in CMS (HDD of PC) by clicking LOCAL SEARCH button and the other is for searching event recorded data stored in DVR by clicking REMOTE EVENT button.

• The list below describes functions of each part of the screen.

1	Tool Bar
2	Watch Mode
3	Date/Time LED
4	Site Tree (DVR and Channels)
5	Calendar
6	IMAGE PRINT button
7	IMAGE SAVE button
8	Playback control button
9	Time Select Bar
10	Fast Forward/Backward & Playback (Click to increase the speed by x1, x2, x4, x8, x16, x32, x64 and Extreme)
11	Network Connect/Disconnect button
12	Audio Channel (Display selected Audio channel)

## 9.2 Remote Search

- Search The REMOTE SEARCH button allows user to playback recorded video of DVR.
- Select Date
- In Calendar, dates with recorded data are marked in red.
- Click the wanted date among the dates marked in red. In background of Time Select Bar, data recorded time is displayed in bar shape.
- Select Time
- Click the time want to playback, then Time Select Bar will move. User may drag the Time Select Bar with mouse.

• When Date/Time search is completed, please click Playback control button to begin playback.

## 9.3 Local Search

- Search The LOCAL SEARCH button allows user to playback recorded data in CMS (HDD of PC).
- Date/Time search procedures are same as Time Search.
- When Date/Time search is completed, please click Playback control button to begin playback.

## 9.4 Event Search

Remote Event

The REMOTE SEARCH button allows user to search event recorded data of DVR.

- ① Designate Event Search start time.
- ② Designate Event Search end time.
- ③ Select camera (video) to search data.
- ④ Check a check box (Motion/Alarm In/Emergency/Serial in) Check box.
- ⑤ Click on Search Index button to recorded search event data.

## 9.5 Playback

### 9.5.1 Playback Control Button

• Select time and click Fast Forward/Backward button.

Ix 2x 4x 8x 16x 32x 64x Extreme

- Click ▶ button to begin playback.
- Use the control buttons below while playback.

◄	Fast Backward Play
	Fast Forward Play
	Play
	Stop
∎∎	Go to the First Image
	Go to the Last Image
∎	Go to the Previous Image
▶	Go to the Next Image

#### CAUTION

Make sure that use control buttons after STOP button. For example, if you want to change from Play mode to Fast Forward Play mode, press STOP button first, select the speed and then Fast Forward Play button. This applies equally when you use other buttons.

## 9.5.2 Print

- This is for printing a selected image (within the red outline).
- Click IMAGE PRINT button and the following screen will appear.
- Choose 'OK' to confirm the setting. Then, the printing proceeds.

Name:	HP DeskJet 672C	Properties

# 14. SERIAL IN (POS/ATM)

# 14.1 Usage of Serial-In Function

- Enables to record/search/display all transactions on monitoring screen by connecting POS/ATM/Cash Register.
- User can choose the data whether to record/display on their taste without limitedly designated protocols.

# 14.2 Connection Method

#### • A, B, C, D, E Type

- This model has one ATM/POS channel by free of charge and it is available to expand its connections up to four channels with additional charge.
- Connect the RS232 port of Serial-in application to USB slot of DVR by using USB to RS-232 Converter Cable and it is available to connect up to 4 serial-in devices by using the converter.
- Applicable converters as follows
- FTDI chipset included converter
- Prolific PL2303 / PL2303X / PL2303HX chipset included converter
- Winchiphead chipset included converter
- When use a converter, please connect USB slot of DVR first, then restart in order to the DVR recognizes the USB converter.
- When use a multi-converter, the port recognizes as Number 1 as its shortest line of converter consequently.
- When use both single and multi-converters, single converter is recognized as Port Number 1.

#### • F Type

- This model does not have ATM/POS channel as bundle, but can be added one channel by additional charge.
- Connect the RS-232 port of ATM/POS machine through the RS-232 port of DVR.

#### A, B, C, D, E Type

It is available to connect 1 Serial-In application without additional option.

User can add 3 more Serial-In applications with additional charge.

This function is only supports English alphabetical characters.

The maximum extension length for RS-232 cable is 15 meters approximately.

#### **F** Туре

This type of DVR is only able to connect a Serial-in function due to the limitation of RS-232 connection.

This function is only supports English alphabetical characters.

The maximum extension length for RS-232 cable is 15 meters approximately.

# 14.3 Connection Diagram

• A, B, C, D, E Type Using USB: Connect RS-232 port to USB port at front/rear of DVR by using a converter.

• F Type Using RS-232: Connect RS-232 port to USB port at front/rear of DVR by using a converter.

# 14.4 Link

## 14.4.1 Link Setup

• Click "Setup>Link>" then shows as below.

#### (NOTE)

The above menu is only available on the DVR model with Serial-In function.

• Click "Serial In" to appear following screen.

Serial In			LINK					
s	erial In		Serial	ln 1	C2			
Link C	amera	Li	nk Alarm Out		Link Notification			
<mark>⊻ 1</mark>	9	$\checkmark$	1	No	E-Mail , IP /Domain

Continuous ZAlarmIn Motion PreAlarm																								
OK Cancel																								

- Tick the box( $\Box$ ) item Alarm In.
- Click the Time/Date that wishes to activate ATM/POS function on schedule.
- It is possible to activate all the time by clicking top-right side of table.
- Click "OK" to save the schedules.

#### (NOTE)

Please do not select the Alarm In and Motion simultaneously on schedule setup. Otherwise, POS/ATM text will be displayed improperly.

## 14.5 Setup

• Please click (+) "System>Devices>Serial-In", then user will see the display below.

#### (NOTE)

This [Serial In] section does not show without additional Serial-in option.

Serial In		DEVI	CES		
Port (r	s232)	Port Settin	ıg	OSD	Both 🖸
Use		Title		Pattern	Auto
1					
2					
3					
4					
		OK	Cance	•	

#### 14.5.1 Title

- Click "Title" item then virtual keyboard will appear.
- Input the title then click (+) to save.

### 14.5.2 Port Setting

• Press (←) the "Port Setting" button in order to set up the port. Default values are Baud rate 2400 bps, Data Bit 5 bit, Stop Bit 1 bit, Parity None.

• When the setup is done, press enter (+) to save the setting.

## 14.5.3 OSD Display

- OSD items are to decide whether to display the information from the serial port connected to the rs232 port on OSD screen.
- They have 4 menus as followings:
- None : displays nothing on the OSD screen.
- Live : displays incoming information from the serial port in real time on the OSD screen.
- Playback : displays the saved information on the OSD screen during replay.

- Both: displays all the information on both Live and Playback mode.

### 14.5.4 Pattern Setting

- User can select the name of serial device if click (↔) the keyboard button of Title.
- When "Use" items of Numbers 1-4 are checked on Serial-In page, it receives the data from the applicable serial device.
- Check I the "Auto" item so as to capture automatically all the data which includes unnecessary dummy data out of serial device as below.

- Analyze among the automatically captured data which will be displayed or discarded then enter Pattern Setting.
- Unless user checks "Auto" item, make sure to set up "Start Pattern" and "End Pattern"
- "Discard Pattern", "Line Delimiter" and "MCPL" are utilized independently, not relation to "Auto" mode.
- It is possible to input and analyze the serial data by clicking "Pattern" after tick the "Auto" box(□) off.

Set	ial In	DEVICES	 -
	Pattern Setting	Serial In	
	Start Pattern		
	End Pattern		
	Dicard Pattern	1	
	Line Delimiter		
	MCPL	0	
		Close	
		Close	

- Each item explains below:
- Start Pattern : Indicates the beginning of the new data when new designated data are received from a serial device.
- End Pattern : Indicates the end of the data when designated data are received from a serial device.
- Discard Pattern : Does not show the designated data on OSD screen. Sets up in order to designate dummy data or characters which is not favorably to be displayed. Can be designated up to 64 of discard patterns in total.
- Line Delimiter : Inputs characters to be used as delimiter between lines.
- MCPL(Minimum Character Per Line): Sets up the number of the minimum strings each line. Does not show the characters on OSD screen if there is a character of which number is below the designated number in each line divided by the line delimiter.

#### Example

• When it firstly connected, the data will be displayed as below.

• Input a certain repeated string to "Line Delimiter".

Serial In Pattern Setting	DEVICES Serial In			100
	Senaim		A state of the sta	
		Espresso \$18125-
